

COBY BENVENISTE

VP of Engineering | Head of Engineering | Hands-on Technical Leader

Tel Aviv-Yafo, Israel · U.S. Citizen · Open to U.S./Europe relocation; remote initially · coby.benveniste@gmail.com · +972 58 681 8698 · <https://cobybenveniste.com>

PROFILE

Hands-on engineering leader with 12+ years across VP Engineering, founding-engineer, Principal, Staff, and technical leadership roles. Currently own engineering, infrastructure, cloud, and DevOps at Marketeam.ai while co-leading product direction, architecting and building the agentic AI platform, and leading a cross-functional product and engineering team. Previously Founding Engineer at theGist, Principal Backend Engineer at Arpeely, and Staff Engineer at OpenWeb, with a background in high-scale backend services, reliability, and low-latency infrastructure.

ENGINEERING LEADERSHIP EXPERIENCE

Marketeam.ai

VP of Engineering

Tel Aviv-Yafo
July 2023 - Present

- Own engineering, infrastructure, cloud, DevOps, and core technical direction at Marketeam.ai while co-leading product design and direction for an agentic AI platform.
- Hired and built a cross-functional team of four engineers, a product manager, a product designer, and two data scientists, leading technical direction, mentorship, and engineering execution while remaining hands-on.
- Architected and built the platform from the ground up, including the production agent harness and runtime, asynchronous workflow and data infrastructure, AWS deployment architecture, and observability with OpenTelemetry.
- Designed multi-tenant security around OAuth2 and PostgreSQL Row-Level Security and spearheaded the company's successful SOC 2 Type II audit.

The Gist

Founding Engineer

Tel Aviv-Yafo
December 2021 - July 2023

- Joined as the first hire and founding engineer, acting as chief architect for a five-engineer team and serving as the engineering interface to the Head of AI while setting technical direction.
- Took the initial Slack summarization bot from a 35-minute prototype to a production product installed across thousands of workspaces with roughly 5,000 active users, earning a Slack "Brilliant Bots" Staff Pick and Product Hunt Product of the Day.
- Owned architecture and infrastructure across the product's evolution, spanning Go event-driven services, low-cost AWS serverless data pipelines, the Electron/Next.js/NestJS workspace, EKS, Terraform, CI/CD, observability, and autoscaling.

Arpeely

Principal Backend Engineer

Tel Aviv-Yafo, Israel
March 2021 - December 2021

- Owned major architecture and infrastructure decisions for a real-time ad-bidding platform sustaining over 1M requests per second, setting tooling direction and reviewing engineering work across the team.
- Re-architected ingress by replacing managed cloud load balancers with an HAProxy fleet on GCP VMs, handling multi-gigabyte-per-second traffic while saving hundreds of thousands of dollars per month.
- Established cross-cluster SRE and observability across GKE with Prometheus, Thanos, Grafana, and centralized alerting, including visibility into bidding spend and win rates.

OpenWeb (Formerly Spot.IM)

Backend Engineer / Tech Lead / Staff Engineer

Tel Aviv-Yafo, Israel
July 2018 - March 2021

- Progressed from Backend Engineer to Tech Lead to Staff Engineer, leading a cross-functional squad of backend and frontend engineers with a product manager before moving into a Staff IC role.
- Co-designed and led migrations into OpenWeb's event-driven 2.0 architecture, including the conversation admin panel, moderation platform, and core conversation components across Go, Kafka, SQS, MySQL, and Redis.
- Led delivery of Moderation 2.0 for a network that reached roughly 50M registered users, supporting several thousand real-time moderation requests per second, while also driving cross-cutting reliability and Kubernetes performance/cost improvements.

Signals Analytics*Software Developer, Data Scientist, Tableau Specialist*

Netanya, Israel

January 2016 - April 2018

- Built and maintained an unstructured-text classification system based on analyst-defined rules that became used across company projects, and developed data models for extracting insights from large datasets.
- Became the company's point person for Tableau development, performance, and optimization.

Jamestown, L.P.*Software Developer (Freelance)*

Atlanta, GA

September 2015 - December 2015

- Developed a system to automate federal tax reporting for a real-estate investment company.

Leapfrog Services, Inc.*Software Developer*

Atlanta, GA

June 2014 - September 2015

- Developed proprietary internal tools used across multiple departments to automate and streamline day-to-day work.

LEADERSHIP & TECHNICAL SKILLS

Leadership:	Engineering Strategy, Hiring, Team Building, Mentorship
Org & Product:	Technical Direction, Cross-functional Leadership, Product Collaboration
Backend & Architecture:	Distributed Services, Event-Driven Architecture, Event Sourcing, Microservices, API Design, Contract-First APIs, Backend-for-Frontend (BFF), High-Throughput Systems, Low-Latency Systems, Multi-Tenant Applications
AI & Agentic Systems:	AI Agents, Agentic Harness Orchestration, Agent Sandboxing and Runtime, Fault-Tolerant LLM Tool Calling, Semantic Search
Languages:	Go, Elixir, TypeScript, Python, SQL, Ruby
Infrastructure:	AWS, GCP, EC2, Auto Scaling, GitHub Actions, Kubernetes, Docker, Terraform, CI/CD
Data & Observability:	PostgreSQL, pgvector, Redis, Kafka, SQS, Elasticsearch, OpenTelemetry, Prometheus, Grafana, CloudWatch
Security:	OAuth2, PostgreSQL Row-Level Security, SOC 2 Type II

SELECTED TECHNICAL WORK & SPEAKING

LiveLoad Elixir<https://github.com/probably-not/live-load>

Open-source load-testing framework for simulating real, distributed, live load on an application.

Declarative AI Flows with gen_statem Elixir, Erlang/OTP, gen_statem<https://youtu.be/duEZxrsTUA4>

CodeBEAM Europe 2025 talk about building AI agents and declarative workflows with Elixir and OTP.

A Murder of LiveViews Elixir, Erlang/OTP, AMoC, FLAME<https://bit.ly/45rs8n1>

ElixirConf EU 2026 talk about running distributed load tests in Elixir and OTP with AMoC and FLAME.
